Junior Developer

I'm an undergraduate-driven tech enthusiast looking for an internship. I have experience with web development frameworks like Django and React, as well as a solid foundation in Python and Java. I am excited to apply my problem-solving abilities and collaborative mindset as an entry-level employee, contributing to creative projects and gaining practical experience in the field. I have a strong interest in software architecture and design patterns. My most recent work was to revamp my school's website, which increased user activity and engagement on the website by 10%.
